

# Setting a course

The course used for racing, (as defined by the Club Sailing Instructions), should be a Port course;

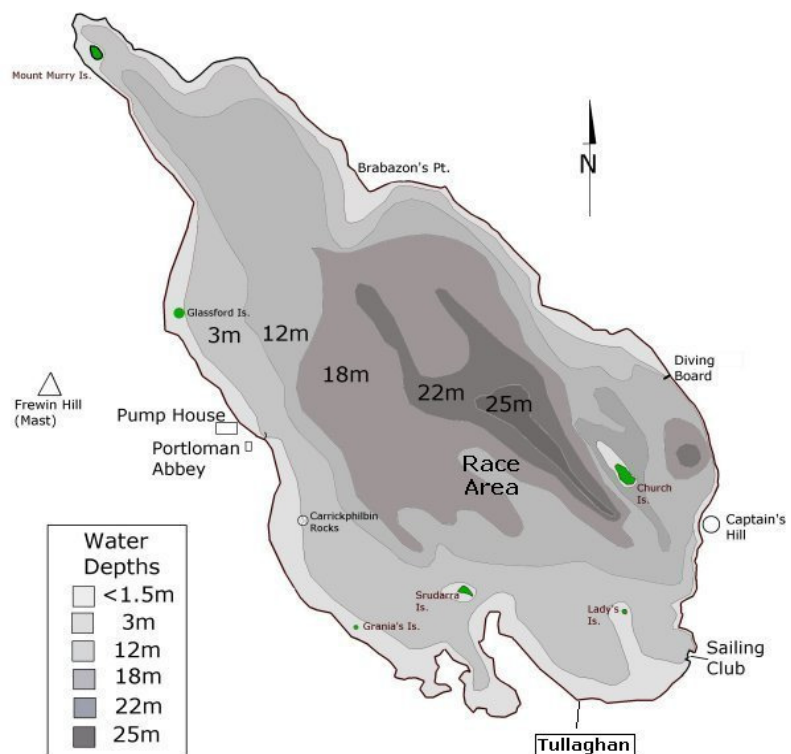

Triangle - Triangle -  
Beat / Run - Beat, (Start-  
1-2-3 , 1-2-3, 1-3-  
Finish).

The start line should be  
at right angles to the  
wind and is defined by  
the rescue boat and the  
Leeward buoy.

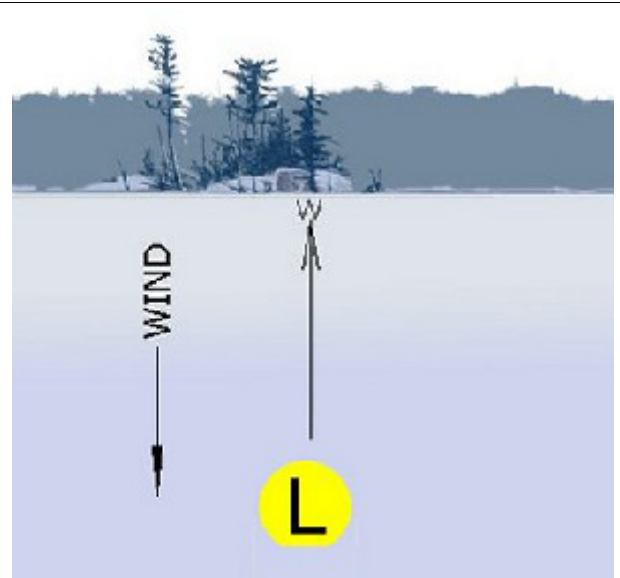

The centre of the race  
area should be North  
West of Church Island, as  
marked on this map of  
the lake. All of the course  
should be in water  
greater than 6m deep,  
particularly at the Jibe  
mark where capsizes are  
common.

Remember that a GP14's  
mast is 6m long, if it  
sticks in the mud during  
a capsize, the most likely  
outcome is a broken  
mast..

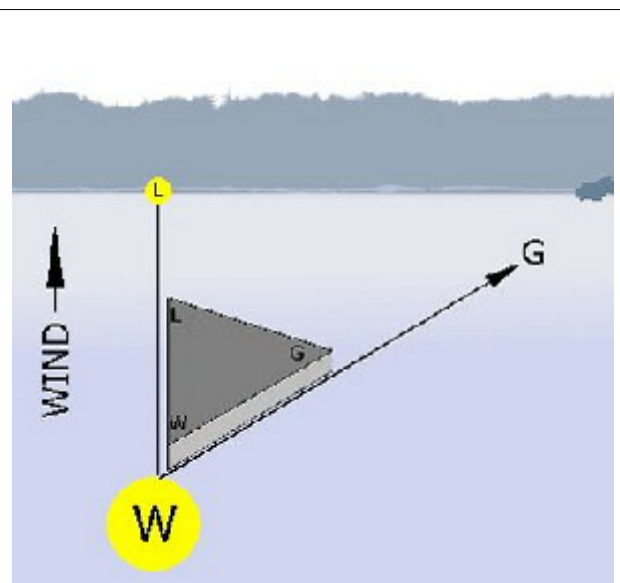

Lay the Leeward buoy (3) and determine the average wind direction in relation to a landmark on the horizon.

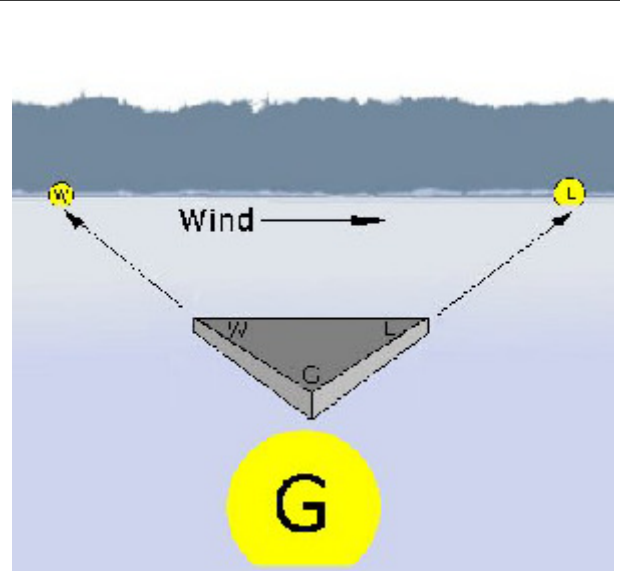

Move up wind to a point where you can just see the Leeward buoy and drop the Windward buoy (1).

Use a Race Triangle to sight the heading to the gybe mark.

Drop the gybe mark (2) along this heading at a point where the edges of the Race Triangle align with the windward and leeward marks.

In light winds (Force 1/2) set a shorter course, if the wind drops you can shorten the course by anchoring the rescue boat opposite a mark and flying the blue flag.
